

CCD-SmarTeam Interface

The CCD-SmarTeam Interface integrates CCD and SmarTeam into a powerful, seamless solution. From CCD use the convenient pull-down menu to access all of the lifecycle functions of SmarTeam. Enjoy the benefits of having the most practical product data management solution and the best 2D drafting system all on your desktop.

- SmarTeam pull-down menu always available
- All lifecycle functions available: Check Out, Check In, Release, New Release, Obsolete, Undo Check-out
- Powerful query capability to find the specific CCD drawing you seek efficiently and quickly
- Bulk Loading to initially store all of your CCD drawings in the SmarTeam Vault
- Switch to a SmarTeam session from within the CCD session and return to the CCD session seamlessly
- Manage CCD external data such as symbols, fonts, drawing formats
- If you already have CCD and SmarTeam, enjoy the benefits of having them work better together.
- "Properties" support synchronizes title block information and SmarTeam meta-data.
- Use SmarTeam view and mark-up capabilities.

Why SmarTeam with CCD?

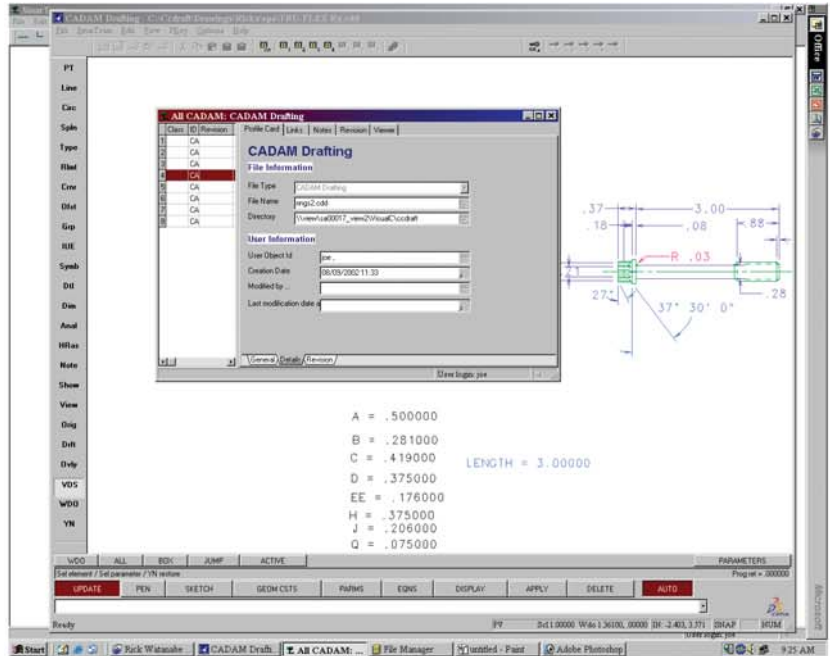

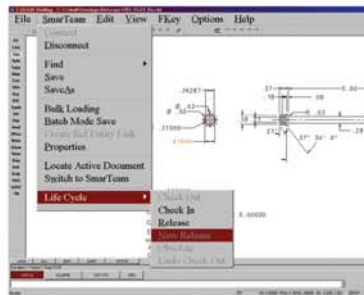

SmarTeam is the powerful yet cost-effective choice to manage all of your CAD and enterprise data.

■ **Data Management:** Secure and manage all of your CCD data including symbol tables, plot formats, and other external data. Ensure data security by using SmarTeam's secure vault. All change activity is managed and an audit trail maintained. Access to data is controlled. Append meta-data such as BOM, revision history, revision level, etc.

■ **Workflow management:** Decrease time to complete ECO's and other processes. Increase visibility and traceability of process status. Manage releases, quality reviews, drawing security, and accountability.

■ **Collaborative Product Commerce:** Leverage knowledge base by enabling effective information collaboration and data flow within an organization

Extend collaboration across a supply chain increasing accuracy, security, and productivity. Deliver higher quality products sooner and at a lower cost.

Technical Requirements

CCD-SmarTeam Interface requires CATIA-CADAM Drafting, SmarTeam, and 256 MB of real memory (RAM) is recommended on the client side. (For server requirements, please refer to the appropriate SmarTeam document.)
